

# Care Coordination Program

at Island Hospital

*For patients with chronic conditions*

*Together, we can help you better manage your condition and enjoy a healthier life!*

- Diabetes
- Asthma
- COPD/ Emphysema
- Coronary artery disease
- Heart failure

## *What is Care Coordination?*

**Care Coordination** is a team approach – between the patient, their healthcare provider and a **Care Coordinator** who is a registered nurse – designed to help individuals with chronic conditions succeed in better managing their own health.

Ask  
your provider  
if this program  
is right for  
you!
